

HIV Testing

RipplePHX primarily uses the Insti Rapid HIV Test.

The Insti!

Accurate Results in Only 1 Minute!

99.96% Accurate!

A few drops of blood from a fingerstick!

Not affected by alcohol, marijuana or other drugs!

It can take 3-12 weeks to detect HIV antibodies!

Re-testing is needed 3 months after last exposure!

Do's & Don't's

- DO emphasize Testing, but also to engage in other services too!
- DO keep your asks low-pressure!
- DO encourage people to register from their phones!
- DO encourage people to use a pager over text notifications!
- DO prioritize people at highest-risk!

- DON'T engage in long conversations that can block registrations.
- DON'T pressure a person who isn't interested in registering.
- DON'T encourage drunk people to get tested - offer a Home Kit.
- DON'T interrupt a test in-progress.

Introduce Yourself!

Build rapport before making your asks!

75% of activity should be prioritized for these people.

Services:

- HIV Testing
- PrEP Appointments
- HIV Treatment
- Condoms & Lube!
